## Education

2024.09- present	<b>Postdoc researcher</b> , Department of Chemistry and Chemical Biology, <i>Cornell University</i> (Ithaca, NY, USA) (Host: Prof. Yao Yang)
2024.03- 2024.08	<b>Postdoc researcher</b> , Department of Chemical and Biological Engineering, <i>Seoul National University</i> (Seoul, South Korea) (Host: Prof. Jungwon Park & Prof. Jaeyune Ryu)
2017.09- 2024.02	<b>Ph.D.</b> , Department of Chemical and Biological Engineering, <i>Seoul National University</i> (Seoul, South Korea). GPA: 3.9/4.3 Advisor: Prof. Jungwon Park <i>Thesis:</i> Investigating Surface Atomic Coordination Chemistry and Degradation Processes of Pt Nanocrystals by Liquid-Cell TEM
2013.03- 2017.08	<b>B.S.</b> , Department of Chemical and Biological Engineering, <i>Seoul National University</i> (Seoul, South Korea). GPA: 3.7/4.3 <i>cum laude</i>

---

## Research Interests & Experiences

My research interest is to maximize the utilization of electrochemical energy for the practical use of renewable energy technologies with high efficiency.

My focus lies in the fundamental understanding of electrochemical mechanisms governing interfacial reaction, activation, and degradation processes of electrocatalysts.

To approach, my works have combined:

- Developing the reproducible electrochemical liquid-cell TEM (e-LCTEM) method
- Developing the 3D atomic structure identification method for metal nanocrystals

1) Developing the reproducible e-LCTEM method:

- Acquiring STEM images of small Pt nanocrystals (< 3 nm) on carbon supports.
- Obtaining CV curves of the Pt/C catalysts comparable to bulk measurement.
- Investigating the degradation process of Pt/C catalysts under AST.  
\* (*In preparation*)

2) Developing the 3D atomic structure identification method:

- Determining the 3D atomic structures of synthesized Pt nanocrystals  
\* (*Science* **368**, 6486, 60-67 (2020))
- Quantifying surface atomic structures of the synthesized Pt nanocrystals  
\* (*Nano Letters* **21**, 2, 1175-1183 (2021))
- Investigating adsorption properties of large-sized molecules on complex surfaces  
\* (*Nanoscale* **15**, 532-539 (2023))

- Revealing a structure-activity (alkaline HER) relationship of the synthesized Pt nanocrystals by using multi-scale simulation  
 \* (*In preparation*)
-

## Presentations

- 2024 10) **S. Kim**, J. Kwag, and J. Park\*, “Reproducible Electrochemical Liquid-cell TEM for Tracking Degradation of Individual Pt nanoparticles on Carbon Supports”, *The Korean Electrochemical Society (KECS) 2024 Spring meeting*, Apr. 2024 (Oral presentation)

- 9) **S. Kim**, J. Kwag, and J. Park\*, “Reproducible Electrochemical Liquid-cell TEM for Tracking Degradation of Individual Pt nanoparticles in Fuel Cell Catalysts”, *Nano Convergence Conference 2024 (NCC2024)*, Jan. 2024 (Oral presentation)

- 2023 8) **S. Kim**, J. Kwag, and J. Park\*, “Developing a Reliable and Reproducible Electrochemical Liquid-cell TEM Method for Understanding the Degradation Process of Fuel Cell Catalysts”, *The 20<sup>th</sup> International Microscopy Congress (IMC20)*, Sep. 2023 (Oral presentation)

- 7) **S. Kim**, G. H. Gu\*, and J. Park\*, “Investigating catalytic activity of an ensemble of synthesized small Pt nanocrystals through their 3D atomic structure and multiscale simulation”, *Samsung Global Technology Symposium*, Aug. 2023 (Poster)

- 6) **S. Kim**, Y. Kim, G. H. Gu\*, and J. Park\*, “Investigating catalytic activity of an ensemble of synthesized small Pt nanocrystals through 3D atomic structure and multiscale simulation”, *The Korean Society of Industrial and Engineering Chemistry (KSIEC) 2023 Spring meeting*, May 2023 (Poster)

- 
- 2022      5) **S. Kim**, D. Kang, J. Kwag, D. Kim, J. Heo, and J. Park\*, “3D atomic structure of Pt nanocrystals related to their catalytic activity and surface ligand adsorption”, *Materials Research Society (MRS) 2022 Fall meeting*, Dec. 2022 (Oral presentation)
- 4) **S. Kim**, D. Kang, and J. Park\*, “Complex adsorption behavior of a PVP ligand on 3D atomic surfaces of synthesized Pt nanoparticles”, *The Korean Institute of Chemical Engineers (KIChe) 2022 Fall meeting*, Oct. 2022 (Poster)
- 3) **S. Kim**, D. Kang, and J. Park\*, “Complex adsorption behavior of a PVP ligand on 3D atomic surfaces of synthesized Pt nanoparticles”, *Center for Hybrid Interfacial Chemical Structure (CICS) 2022 Workshop*, Jun. 2022 (Poster)
- 
- 2021      2) **S. Kim**, J. Kwag, and J. Park\*, “Reproducible real-time imaging method for degradation process of fuel cell catalysts using *in situ* TEM”, *72<sup>nd</sup> Annual Meeting of the International Society of Electrochemistry*, Sep. 2021 (Poster)
- 
- 2018      1) **S. Kim**, B. H. Kim, J. Heo, D. Kang, and J. Park\*, “3D reconstruction of single nanoparticle and structure analysis in atomic resolution”, *The Korean Society of Industrial and Engineering Chemistry (KSIEC) 2018 Spring meeting*, May 2018 (Poster)
- 

## Teaching Experience

---

### **Teaching assistant**

---

- Spring 2020      Physical Chemistry 1 (*45 contact hours*)
- Fall 2018      Elementary Lab. for Chemical and Biological Engineering  
                  (*40 contact hours*)
- 

### **Mentoring**

---

- Spring 2019      Tutor for Learning Community ‘Sublime’  
                  (2 students, one for Organic Chemistry – *13.5 contact hours*  
                  and the other for General Chemistry – *15 contact hours*)
- Fall 2018      Tutor for Learning Community ‘Sublime’  
                  (2 students, one for General Chemistry – *15 contact hours*  
                  and the other for General Chemistry – *9 contact hours*)
- Summer 2018      Tutor for Learning Community ‘Sublime’  
                  (1 student for General Chemistry – *9 contact hours*)
- Spring 2018      Tutor for Learning Community ‘Sublime’  
                  (1 student for General Chemistry – *12 contact hours*)
-

---

## Awards and Honors

---

2024	<b>Best Student Oral Presentation Awards,</b> <i>Nano Convergence Conference 2024 (NCC2024)</i>
2023	<b>Best Oral Presentation Awards,</b> <i>The 20<sup>th</sup> International Microscopy Congress (IMC20)</i>
2020	<b>Jeju Human Resources Development Scholarship (~\$1,600),</b> <i>Jeju Institute for Lifelong Education and Scholarship</i>
2017, 2018	<b>Lecture &amp; Research Scholarship</b> (2 terms: ~\$8,000 total), School of Chemical and Biological Engineering, <i>Seoul National University</i>
2017	<b>cum Laude,</b> <i>Seoul National University</i>
2016, 2017	<b>Work-Study Scholarship</b> (2 terms: ~\$2,400 total), <i>Seoul National University</i>
2016	<b>GS Caltex Global Project</b> (Gold Prize: ~\$800). School of Chemical and Biological Engineering, <i>Seoul National University</i>
2014-2016	<b>Chungsoo Scholarship</b> (Full funding of tuition for 6 terms: ~\$15,000 total), <i>Chungsoo Scholarship Foundation</i>

---

## Skills

---

**Research Skills:**

- *In situ* electrochemical liquid-cell TEM/STEM (e-LCTEM/STEM)
- Identical-Location TEM/STEM (IL-TEM/STEM)
- Electrocatalysis performance test (RDE, H-cell) for ORR and CO<sub>2</sub>RR
- 3D structure determination for nanocrystals (3D SINGLE)
- Nanomaterial characterization (Raman, XRD, NMR, IR, and so on)
- Photolithography
- Nanoparticles/Catalysts synthesis

**Software:**

- Python
